

## ***EDITORIAL FROM EDITOR-IN-CHIEF***

International Science Congress Association announces the release of its yet another broad spectrum peer reviewed journal **Research Journal of agriculture and forestry Sciences** for electronic circulation all over the world.

This journal links basic and applied research on agriculture and forestry sciences, which serve as a valuable source of information for research workers, students, teachers and industrialists related to this field.

A wide number of disciplines are incorporated into agriculture and forestry – from science (biology, chemistry, physics, biosciences and social sciences), environmental studies food & technology, economics and policy making. This comprises of comparative assessment of farming systems, including aspects of multifunctionality and interactions with forestry, socio-economic and cost-benefit analysis, agro-meteorological models for short-term harvest, diversification and specific adaptation, mixed farming systems and land use practices, adaptation of plants, animals and cropping systems to biotic and abiotic stress as well as specific climate change mitigation and stress adaptation measures at farm, new diseases and pests, conservation and use of biodiversity etc, and in deploying different agricultural practices including biotechnology.

Papers providing required knowledge of the changing global demographic, dwindling natural resources, the effects of climate change and tools to support productive, resource-efficient and flexible systems for safe and secure supply of food, feed and other bio based raw-materials without compromising ecosystem services, exploit advances in conservation agriculture and reduce green house gas emissions, implementation and monitoring of relevant strategies, management, policies and legislation based on agriculture and forestry activities are also entertained. We invite contributors from worldwide to publish their innovative in this journal.

**Prof. Dr. Dipak Sharma**
